

MESSAGE FROM THE EXECUTIVE DIRECTOR

Welcome to the Unilearn Foundation Program.

The Unilearn Foundation Program is a quality University Foundation Program designed specifically to provide international students the opportunity to upgrade your English and academic skills to meet the entry requirements for universities in Australia.

A Certificate IV in Business Studies not only provides you with a strong foundation for further study at university, but also enables you to connect easily to a wide range of university options.

Unilearn enjoys a high success rate of placing students in their chosen degrees on completion of the Certificate IV in Business Studies.

The Unilearn program is managed by Education Queensland International working in conjunction with Southbank Institute of Technology in Brisbane, who accredit and issue the qualification.

Both Queensland government institutions have extensive experience in offering high quality education to international students and as a result have excellent reputations both in Australia and internationally.

Unilearn has been developed in Australia and complies with Australia's high quality education standards. The program focuses on meeting the individual needs of students through a range of English based learning experiences tailored to suit different learning styles.

On successful completion of the Unilearn Foundation Program students can apply to further their studies at an Australian university.

I wish you every success in the Unilearn Foundation Program and trust your learning experience will be invaluable.

Joanne House
Executive Director

Queensland Government Department of Education and Training
(trading as Education Queensland International)
